RADIO BY GROUND AS WELL AS AIR

SAN DIEGO, Calif., Aug. 8.—Radio-grams will be revolutionized by transmission through the earth and water, instead of the air as the result of discoveries made at a little experiment station located on a barge in San Diego bay. It was predicted today by Lieut. R. A. Morton of the navy radio laboratory at Mare Island who is conducting the experiments.

First proof of the success of the new method of radio-transmission, was made when the United States navy department sent a message from the Annapolis station to the British admiralty that the dirigible R-34 had been sighted off the American coast. Lieut. Morton was at his instruments, heard the message and copied it in its entirety, he said.

CARD OF THANKS

We desire to express our appreciation and thanks for the kindnesses extended to us during our recent bereavement.

MRS. CATHERINE McAVOY AND FAMILY. ADVAST

BE YOUR OWN BROKER

We will open a "public call" in the Red Cross Building about 8 doors below the Post Office, about the middle of next week. The exact time will be announced in the local press at a later date. In addition to handling the Tonopah, Divide and Goldfield stocks as are now listed in San Francisco and New York, we will call stocks of all mining districts for which there may be a market. The call will promptly start at 8 P. M.

Each buyer and seller can be his own broker and may offer to buy or sell any stock he desires by making his offer or bid to our auctioneer who will receive and announce all offers, bids and sales during the call.

We believe the opening of this institution is for the good of Tonopah and vicinity and that it will create trading and interest in various stocks which otherwise would not be possible.

Everyone interested in the welfare of Nevada's mining industry is cordially invited to be present. WATCH the local papers for further announcements.
